

SAVING TIME. SAVING LIVES.

Advancing Sepsis: Recognition Before the ED

Improving early identification and management
of sepsis in the prehospital environment

Join us LIVE via Zoom

Wednesday, July 8 | 1:00–2:00 p.m. EST

Key Clinical Facts

- Dr. Cheskes presents his work on Prehospital Management of Sepsis: The PITSTOP Trial
- Sepsis mortality: Up to 30-50% in critical cases
- Early recognition significantly reduces mortality
- EMS is the first link in the chain of survival for sepsis patients

Learning Objectives

- Recognize early signs and symptoms of sepsis in the field
- Understand the importance of early intervention and rapid transport
- Use the Zenix dashboard to detect subtle vital sign trends
- Apply real-time data to support critical decision making
- Utilize RescueNet® CaseReview for QA/QI and post-call analysis
